PREAMBLE

Sonamukhi College is situated at Sonamukhi town, a municipality in Bankura District of West Bengal. It is about 30 km. from Bishnupur, 45 km. from Bankura, 45 km. from Durgapur and 60 km. from Burdwan. Sonamukhi college is blessed to reside by sal forest at one side and agricultural field in another. The forest of Sonamukhi Range is a tropical dry deciduous forest under Bankura North Forest Division, West Bengal. This forest produces vast majority of forest product of Bankura District.

About the Seminar

Life on Earth is sustained by plants. They are the basis for biospheric ecosystems, have a profound impact on atmospheric chemistry and supporting other organisms. As such plants will be essential in counter-acting the problems faced in sustainable maintenance of agriculture and forest resources and interlinked areas with science-based solutions. This national seminar on 'Plants, the natural wonder : issues & concern' is attempted to engage the broad plant science research community in developing a consensus plan to invigorate and guide plant science research towards sustainable maintenance of plant resources/life and well-being of human-kind.

Our goal is to develop a forward-looking perspective on the botanical profession for the twenty-first century. Working together at all levels – local, regional, national and global – to understand, conserve and use sustainably the world's immense wealth of plant and its effect on interrelated biotic environment whilst promoting awareness for its effective implementation.
